

ENGLISH LANGUAGE PAPER 4

GENERAL INSTRUCTIONS

This paper consists of two parts: Part A, Group Interaction; and Part B, Individual Response. Part B will immediately follow Part A. DO NOT write anything on this page.

PART A Group Interaction

You will be given 10 minutes to prepare. The time allowed for the group interaction is 8 minutes (or 6 minutes for a group of 3 candidates). You may make notes on the notecard provided and refer to your notes during the discussion.

Artificial Intelligence and Student Learning

Artificial intelligence (AI) is becoming more common in education around the world. Many students now use AI tools to help them study. For example, students may use ChatGPT to explain difficult ideas, check their writing or generate study notes. Some students also use tools like Grammarly to improve their grammar and vocabulary. These technologies can make learning more convenient and efficient.

Supporters of AI believe that it can help students learn more effectively. AI tools can provide quick answers and explanations, which may help students understand difficult topics more easily. In addition, AI can offer personalised learning suggestions based on a student's progress and learning needs.

However, some teachers and parents are worried about the negative effects of AI. They are concerned that students may rely too much on AI tools when completing their homework or projects. If students simply copy answers generated by AI, they may not develop important skills such as critical thinking, creativity and problem solving.

Because of these concerns, many schools are now discussing how students should use AI responsibly. Instead of banning AI completely, some educators believe that schools should teach students how to use AI as a helpful learning tool while still encouraging independent thinking and original ideas.

Your school is discussing how students should use AI in their studies. Your group is asked to suggest some ideas. You may want to talk about:

- how AI tools can help students learn more effectively
- possible problems caused by using AI too much
- whether schools should create rules for using AI
- anything else you think is important

PART B Individual Response

The examiner will ask you one or more questions based on Part A. You will have up to 1 minute to respond.

- how AI tools can help students learn more effectively
- possible problems caused by using AI too much
- whether schools should create rules for using AI
- anything else you think is important

PART B Individual Response

1. Do you think AI will change the way students learn in the future?
2. Do you agree students may become lazy if they rely too much on AI.?
3. Do you think schools should allow students to use AI tools when doing homework?
4. In your opinion, what are the advantages of using AI in education?
5. What skills should students develop in the age of artificial intelligence?
6. Do you think teachers will still be important if AI becomes more advanced?
7. How can students use technology responsibly in their studies?
8. Besides AI tools, what other technologies can improve learning?
